Date of Submission: **10 March, 2019**

Motivation:

“Onukabbo” is a cross platform Bangla blog site which will allow bloggers to spread their ideas, thoughts with the real world and will help bloggers to get feedback and improve their knowledge on many aspects.

List of Primary Actors:

Our website has 3 primary actors:

- Unregistered User
- Registered User
- Admin

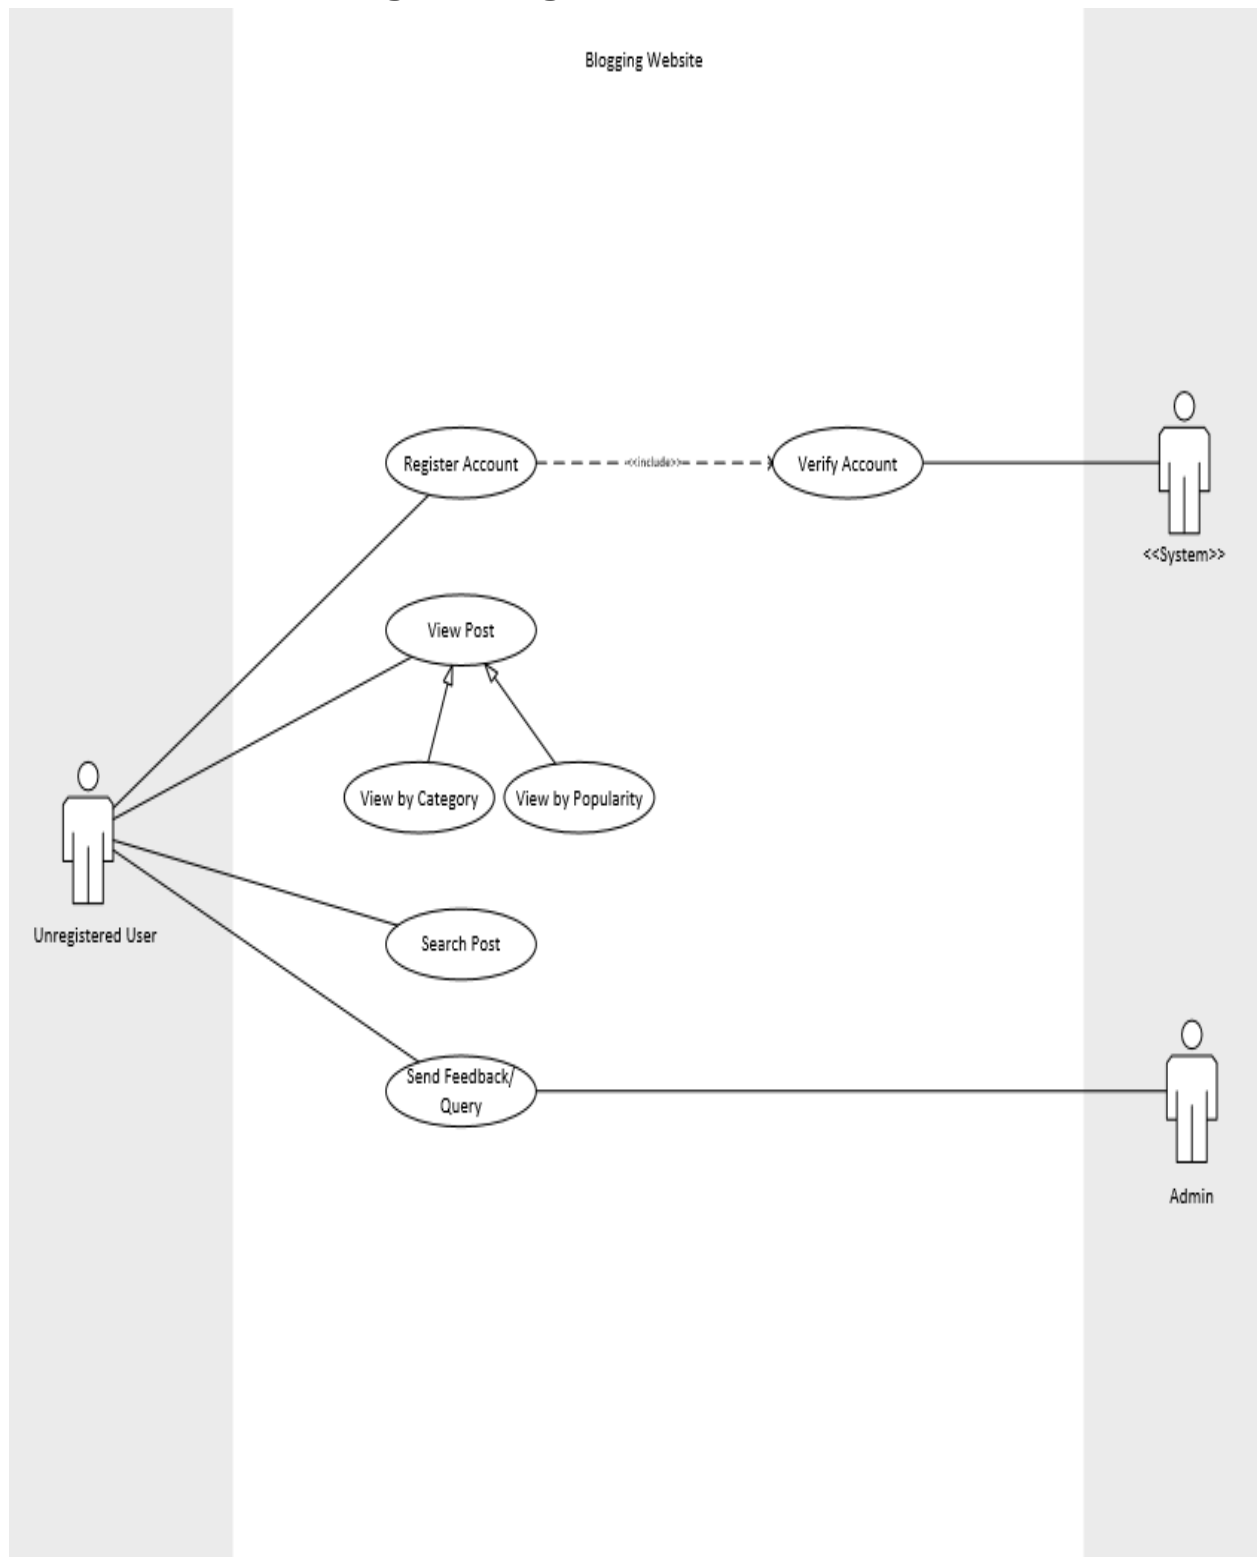

List of Secondary Actors:

In both case when registered and unregistered user acted as a primary actor, we have the same 2 kinds of secondary actors. These are:

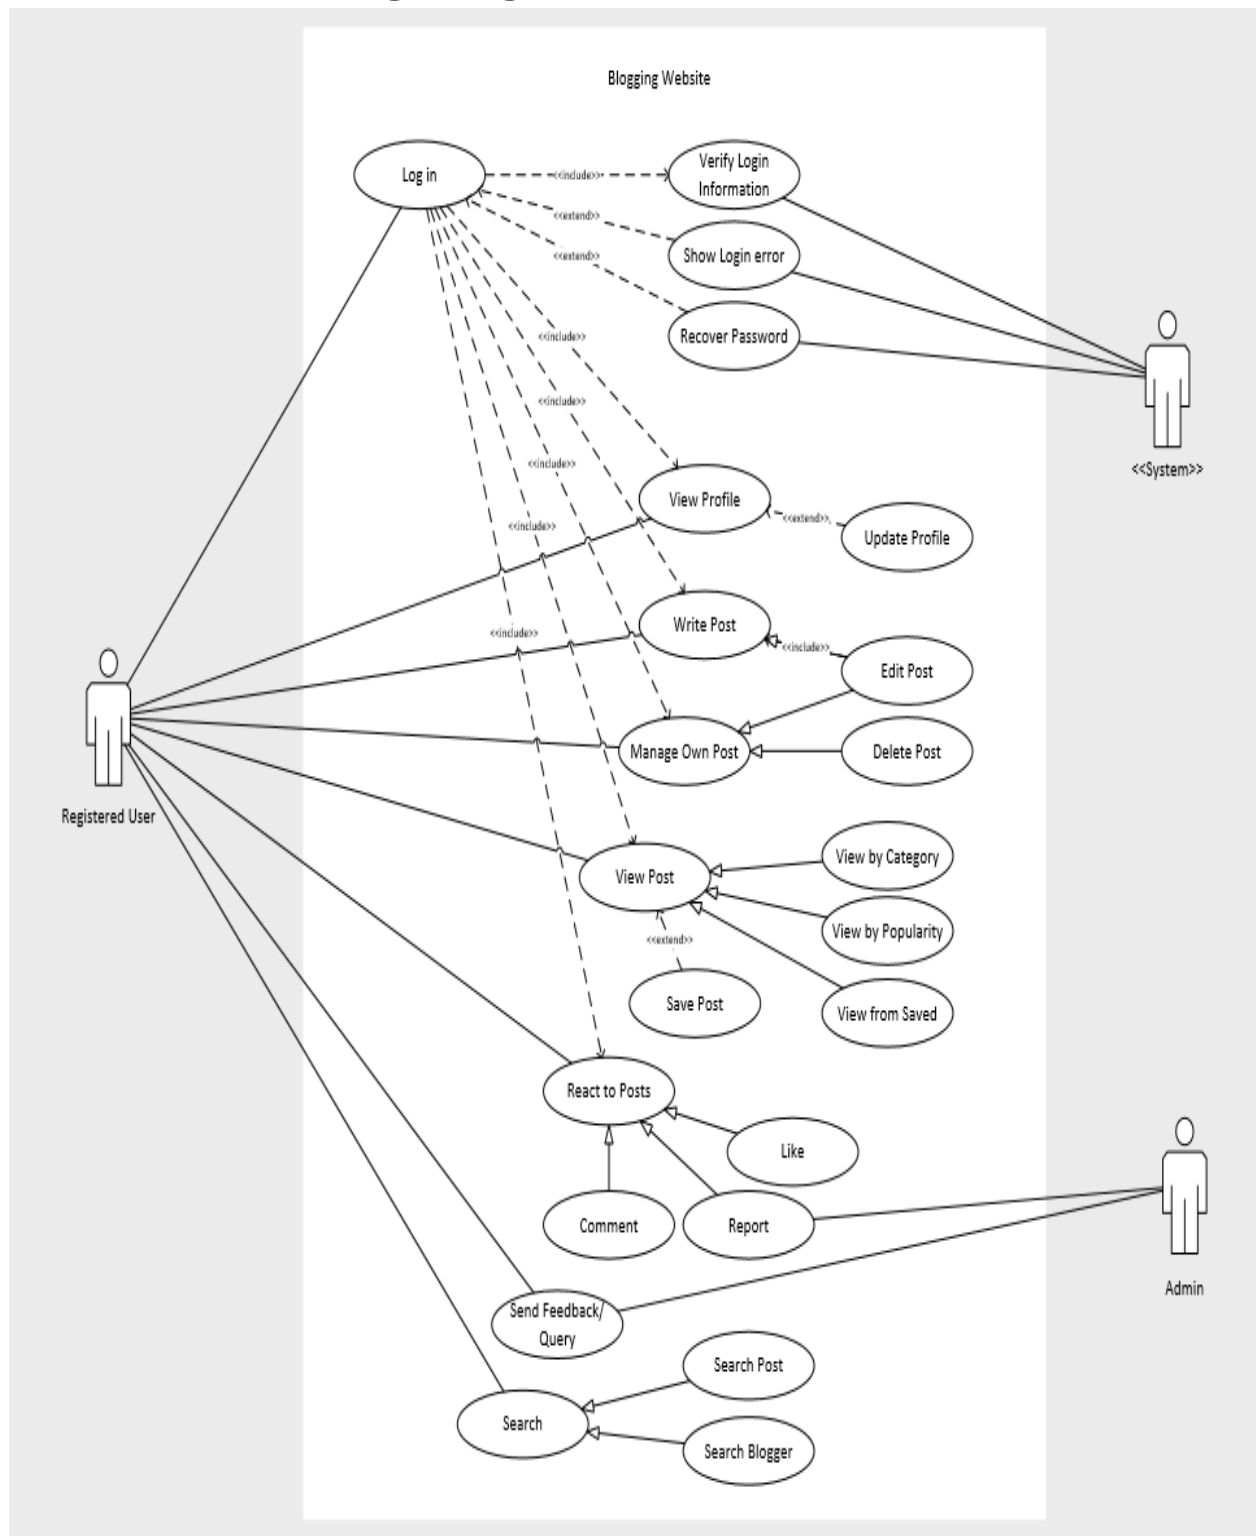

- System
- Admin

Use Cases According to Primary Actors:

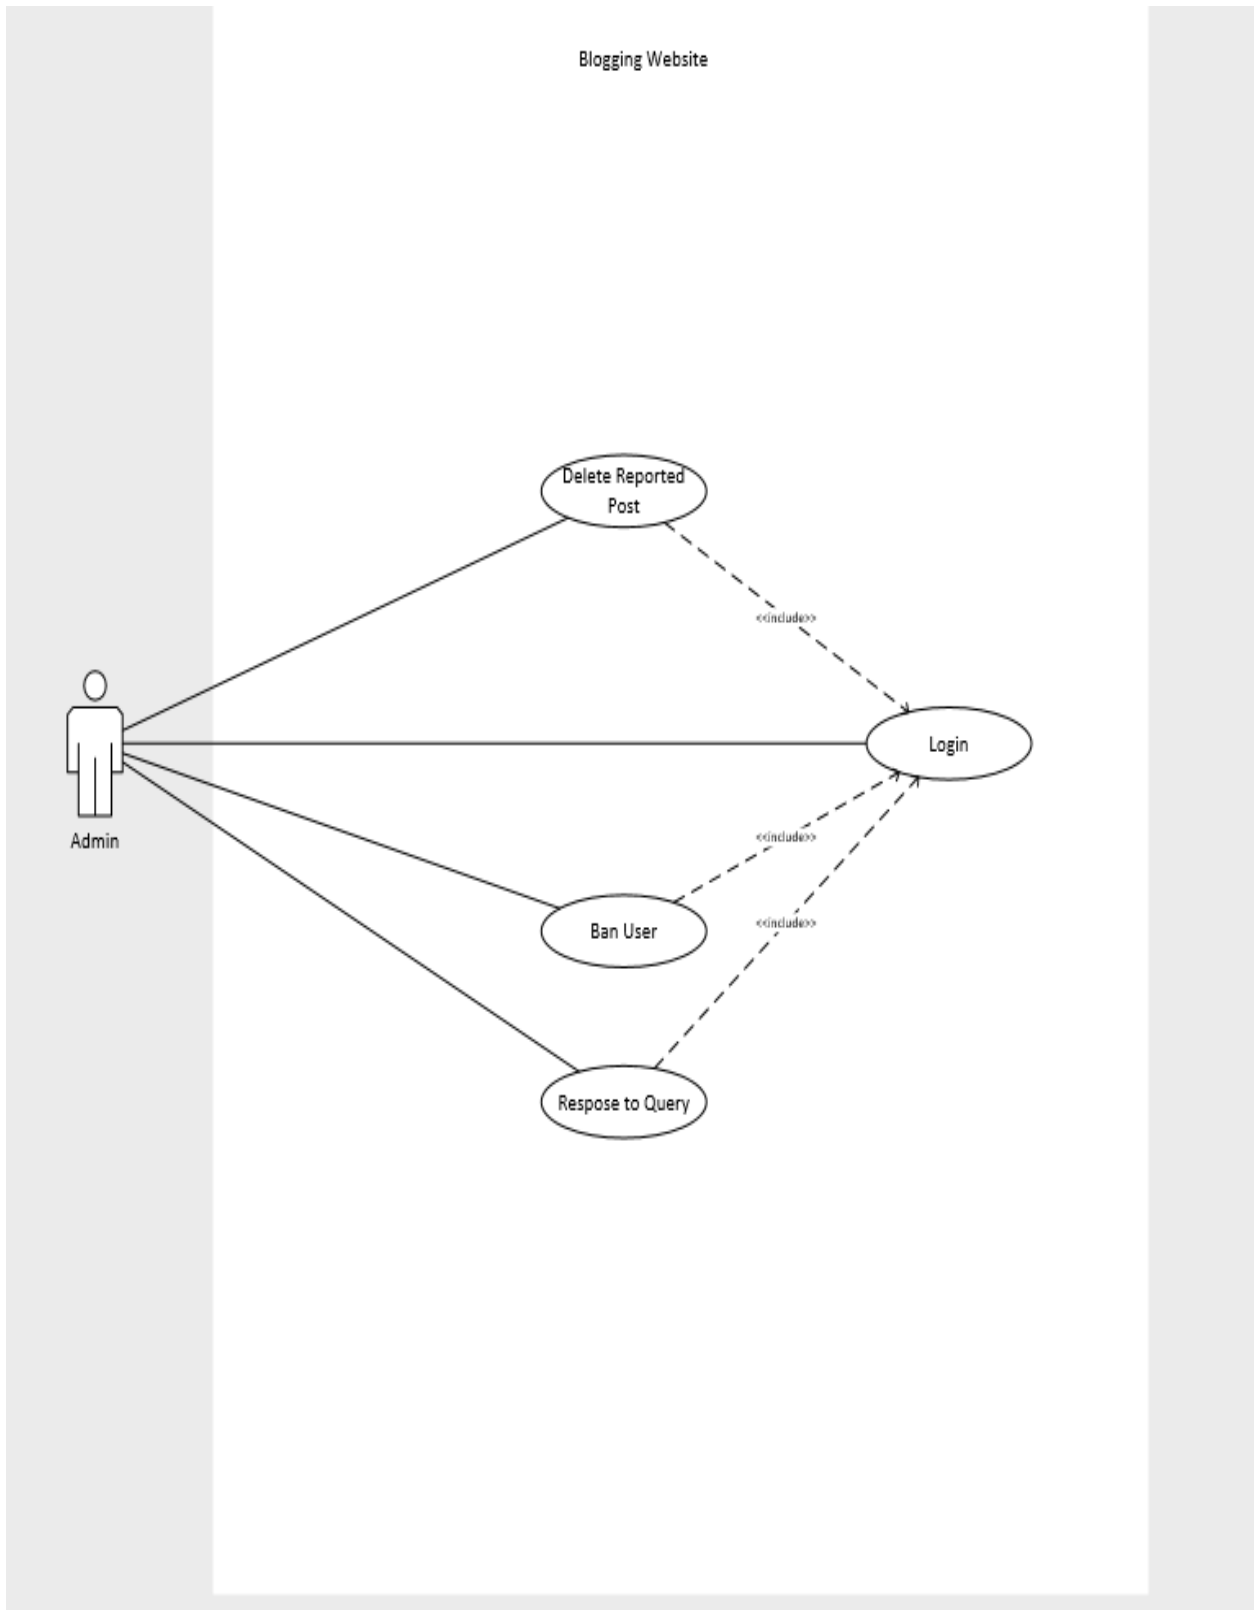

- Use Cases According to Unregistered User

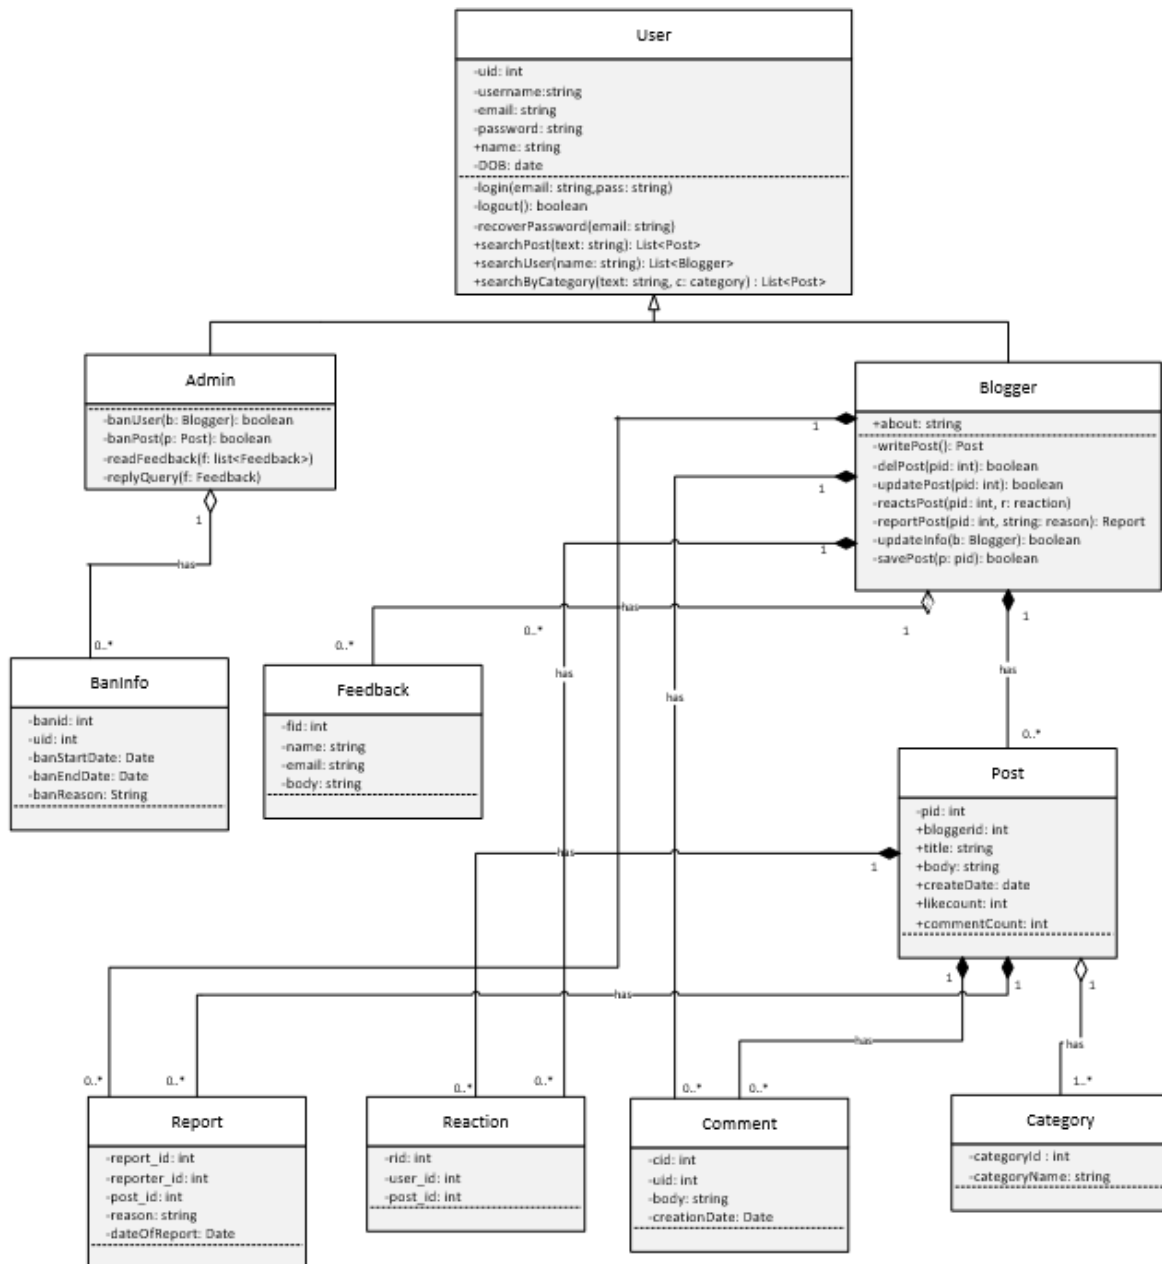

- Use Cases According to Registered User

- Use Cases According to Admin

Class Diagram:

Conclusion:

We tried to visualize our project through Use Case Diagrams and Class Diagram for our system. We have managed to gather a better understanding about our system in the process which is immensely significant when developing any system.
